

Le Product Backlog

Document central de l'équipe Scrum et du Product Owner

Contient toutes User Stories du projet: priorisées et valorisées

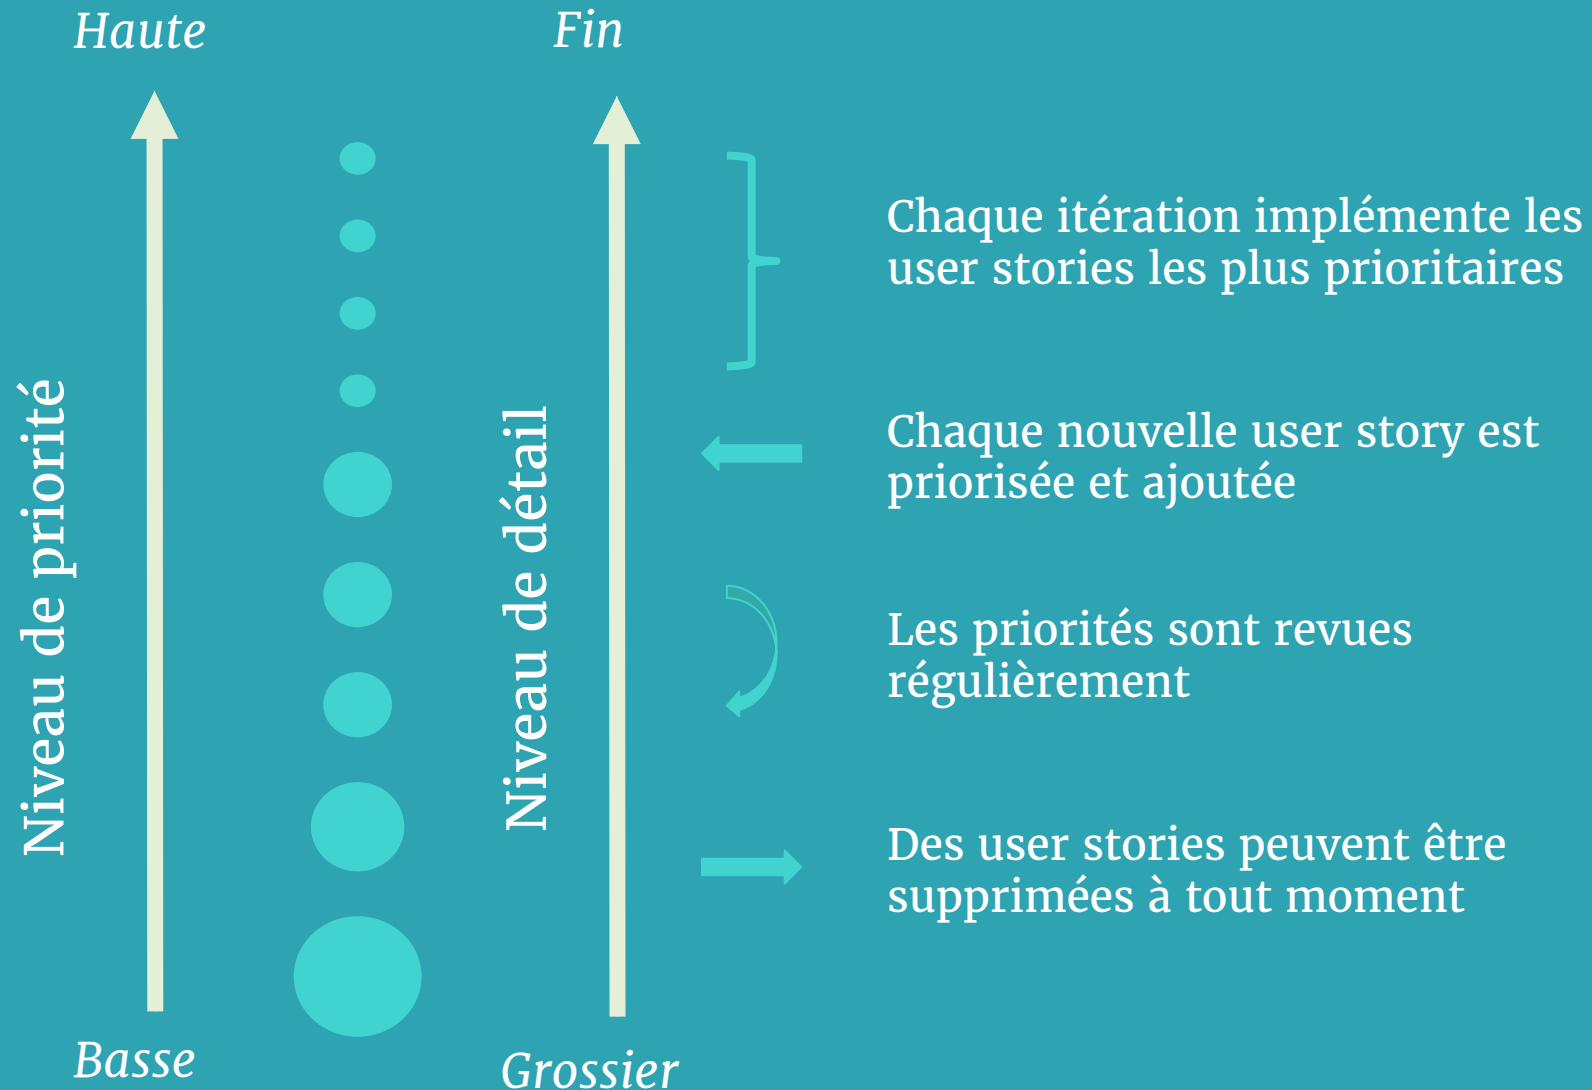

Evolue au cours du projet, sous la responsabilité du PO

Prioriser

Très rare de pouvoir assigner un ROI

La priorité est basée sur le métier, mais les contraintes techniques entrent en jeu

Assigner des « points de valeur » aux User Stories

Echelle de points pour définir la valeur métier

Prioriser toutes vos stories en vous basant sur la valeur métier !

Priorisation par MoSCoW

M: Must Have, doit être fait (vital)

S: Should Have, devrait être fait (essentiel)

C: Could Have, pourrait être fait (confort)

W: Won't Have this time but would like later, ne sera pas fait cette fois mais plus tard (luxe, zone d'optimisation budgétaire)
